Natural Resources Conservation Service Report To Papio-Missouri River NRD Board July 13, 2017 Neil Jensen, District Conservationist

NRCS OFFICE UPDATES

Environmental Quality Incentive Program (EQIP)

NRCS was notified that we received and additional \$200,000.00 in EQIP funds within the Papio-Missouri River NRD. The types of practices that will be funded with the addition funds include cover crops, grassed waterways and water and sediment & water control basins.

Conservation Stewardship Program (CSP)

9 CSP applications have been preapproved within the Papio-Missouri River NRD. These 9 participants have a wide variety of practices planned. Practices included:

- Cover Crop
- Nutrient Management
- Pest Management
- Critical Area Planting (Ephemeral Control)
- Pasture Planting
- Prescribed Grazing
- Tree/Shrub Establishment
- Forest Stand Improvement
- Conservation Cover (Pollinator Habitat)

Natural Resources Conservation Service accepting funding applications through July 21.

The USDA Natural Resources Conservation Service (NRCS) has funding available to help Nebraska's farmers control erosion on their cropland. This funding is available through a special Ephemeral Gully Control Initiative under the Environmental Quality Incentives

Program. Eligible producers have until July 21 to apply.

According to NRCS, recipients of USDA program benefits – like federal crop insurance subsidies and conservation program payments – are required to control erosion on all cropland determined to be highly erodible. The funding available through this special initiative can help farmers meet that requirement.

Conservation practices such as cover crops and grassed waterways are good solutions for controlling ephemeral gullies, which is required by conservation compliance provisions. Conservation buffers are effective in controlling erosion from both water and wind and help protect the soil, improve air and water quality, enhance fish and wildlife habitat, and beautify the landscape.

According to NRCS, over the last couple of decades, there has been a continual decrease in grassed waterways due largely to the adoption of large-scale farming equipment and conservation cropping systems that rely heavily on herbicides to control weeds. On some fields, this has led to increased erosion and ephemeral gullies.

Ephemeral gullies are those rough spots where water concentrates and causes soil to wash away, creating small ditches. While the damage to cropland appears to be small, if not controlled, the negative impacts like loss of inputs, decreased soil health and yields can be significant. Plus, it can cause farmers to be out of compliance with USDA's Food Security Act requirements.

NRCS wants to encourage producers who have ephemeral erosion on their cropland to take this opportunity to address this issue. Our conservationists are available to work with farmers one-on-one to develop a custom conservation plan to help keep farmers in compliance with USDA Farm Bill requirements and keep their farm ground healthy and productive.

For more information, and to apply for funding through this special initiative, visit NRCS in your local USDA Service Center before July 21.

USDA is an Equal Opportunity Provider, Employer, and Lender.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call

(866) 632-9992. Submit your completed form or letter to USDA by:

(1) mail: U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights 1400 Independence Avenue, SW Washington, D.C. 20250-9410;

(2) fax: (202) 690-7442; or

(3) email: program.intake@usda.gov.
