

Mini Classroom Environmental Grants

Name & Date:

School & Grade:

Date of Project:

Project Description:

Purpose & Learning Goals:

Supplies Needed:

Estimated Costs & Grant Request:

Instructions: These grants will pay for related expenses for environmental activities and projects in your classroom. These grants are on a first-come, first-serve basis, and have a maximum of \$50 per teacher. You're encouraged to apply now!

Fill out this form with your grant request and description. A check will be made to you for supplies within a month--it does take some time to make checks, as they must be approved by our Board of Directors. Most environmental-related requests will be approved; we'll let you know if your request is not appropriate for the scope of this grant.

While receipts will not be required, we do request a SHORT project report on how your activity went and what the students learned. This is due within one month of project completion. Please return any unused funds. If your project is not completed in the school year, you will be asked to return the grant money.

Ideas: Here are a few general ideas that might work into your curriculum. We have several more ideas and resource guides at the NRD office.

- Environmental Panoramas
- Rainsticks
- Plantings
- Earth Day Celebrations
- Bus Trips to NRD Programs
- Butterfly life cycle kits
