Agenda Item: 10.

Memo to the Programs Projects and Operations Subcommittee

Subject: Cinnamon Acres Sediment Structure Outlet Repair

Date: November 3, 2011 Updated November 8, 2011

By: Gerry Bowen

In 1995, the District, in cooperation with the Cinnamon Acres Subdivision, installed a wetland/sediment basin in one of the tributaries leading to Wehrspan Lake. The District is responsible for operation and maintenance of the project. The spillway for the structure was fortified with riprap in 1997 and the project has been monitored annually with only minor repairs since that time.

Heavy rain storms caused considerable damage to the outlet structure and it was decided to install a sheet-pile structure to stabilize the outlet area. In June, plans were prepared by Olmsted Perry Consulting Engineers and bids solicited. The Engineer’s estimate was $28,518.

At that time, the District received one bid for the project that greatly exceeded the engineers’ estimate; that bid was rejected.

The project has been re-bid and the bid opening was held on Monday, November 7, 2011. Five contractors obtained copies of the plans and specifications, with two bidders responding to the invitation; McC LLC (the lone bidder in June) and M.E. Collins Contracting Company. The lowest bid was received from McC, LLC in the amount of $58,195 (see attached bid summary and recommendation from Olmsted & Perry). Following the first bid, the engineer revised his estimate to $37,500. Based on this, the District included $40,000 in the FY 12 budget for this project.

- Management recommends that the Subcommittee recommend to the Board that the General Manager be authorized to execute a construction contract with McC, LLC in the amount of $58,195.00 for the Cinnamon Acres Sediment Structure Outlet Repair Project.

Re: Sediment Basin Outlet Control Improvements
within S.I.D. 230 (Cinnamon Acres) of Sarpy County, Nebraska
OPCE Project No. 11068-01

Dear Mr. Bowan:

Bids were received on Monday, November 7, 2011 at 10:00 a.m. for the above referenced project. Two bids were received as shown on the enclosed “Bid Tabulation”. McC, L.L.C. is the apparent low bidder on the project at $58,195.00 with the alternate completion date of April 15, 2012. The “Engineer’s Estimate” (a copy of which is enclosed) is $37,500.00.

We have reviewed the bids and recommend the NRD consider awarding the project to McC, L.L.C subject to available funding.

Please let me know if you have any other questions related to the project.

Sincerely,

OLMSTED & PERRY CONSULTING ENGINEERS INC.

Memo to the Programs Projects and Operations Subcommittee

Subject: Cinnamon Acres Sediment Structure Outlet Repair

Date: November 3, 2011

By: Gerry Bowen

In 1995, the District, in cooperation with the Cinnamon Acres Subdivision, installed a wetland/sediment basin in one of the tributaries leading to Wehrspan Lake. The District is responsible for operation and maintenance of the project. The spillway for the structure was fortified with riprap in 1997 and the project has been monitored annually with only minor repairs since that time.

Heavy rain storms caused considerable damage to the outlet structure and it was decided to install a sheet-pile structure to stabilize the outlet area. In June, plans were prepared by Olmsted Perry Consulting Engineers and bids solicited. The Engineer’s estimate was $28,518.

The District received one bid for the project that was nearly 2.5 times the engineers estimate, that bid was rejected.

The project has been re-bid and the bid opening is scheduled for Monday, November 7, 2011. Management will have a recommendation at the Subcommittee meeting.
